

INFOTEC QUALITY POLICY

Infotec provides high quality, advanced technology display products to public transport and other markets.

The use of our Quality Management and other internal systems are directed by Infotec's top management who are committed to operating every aspect of the company to those standards that offer the highest possible quality of service to our customers, whilst achieving our business objectives.

We have a progressive style of management that enables a positive quality culture to exist at all levels.

Reports from our systems are used to measure products and services, department and individual performance.

Measurements are acted on directly, to continually improve all company activities, including the Quality Management System itself and ensure compliance with applicable business legislation. Improvement will include on-going training, planning and investment.

Our employees are familiar with this policy and are encouraged to demonstrate their own ideas to develop; then achieve individual high quality performance. This policy is publicly available.

Tim Court
Managing Director
