

Our Commitment to achieving Net Zero:

Target

In accordance with PPN 06/21 Infotec is committed to achieving Net Zero emissions by 2050.

Measurement and Review

In order to progress to achieving Net Zero, we have adopted a series of five year carbon reduction targets which will be monitored and reviewed annually as objectives within our Environmental Management System against Scopes 1, 2 & 3.

Stage One

We project that carbon emissions from our current baseline for scopes 1, 2 & 3 will decrease over the next five years to 11810 tCO₂e by May 2028.

This is a reduction of 41%.

Action

We will then take any necessary steps to adjust current, or introduce new strategies to ensure the 2050 target can be met.
