# ENVIRONMENTAL & SUSTAINABLE DEVELOPMENT POLICY

## Environmental Policy

Infotec Ltd operates from a single site in Ashby-de-la Zouch, manufacturing LED and TFT Customer Information Systems (CIS) for the Rail and Bus markets.

The Group Senior Leadership Team are committed to minimise the impact on the environment from the company's business activities and to continuously improve its level of environmental performance.

The company will therefore: -

- Comply with relevant environmental legislation and regulations plus any other relevant requirements of organizations of which the company is a member.
- Take all necessary actions and precautions needed to prevent environmental pollution incidents.
- Set realistic environmental targets and objectives; which are measurable and consistent with our business activities. This will include collaboratively working with Journeo Group in support of its stated Carbon Reduction Projects.
- Ensure our leadership team uses Key Performance Indicators to measure the output of our Environmental Management System which will then take account of our environmental impact.
- Raise the awareness of environmental issues and implement environmental training for all its employees and people working on their behalf, in so that they will appreciate they can influence the success of the policy and take ownership of it for the benefit, not only of the global environment, but for the local environment too.
- Ensure suppliers, customers and other interested parties are informed of this policy and seek their co-operation to minimize the adverse effect of their activities on the environment.

## Sustainable Development Policy

We will also: -

- Support a precautionary approach to environmental challenges as they are presented.
- Undertake initiatives to promote greater environmental responsibility.
- Encourage the development and use of environmentally friendly technologies when designing and developing our products or introducing new processes within our business.
- Remain consistent with our social responsibility with regard to the treatment of groups or individuals who may be associated with our activities; either directly or indirectly, via our supply chain or the deployment of our products.
- Be a model of corporate integrity with a high standard of ethics and environmental awareness in our relationships with customers and all other interested parties.
